| PRODUCT NAM<br>5300 – HI HIDE<br>Pro - Tech<br>Latex / Eggshe<br>Finish | colo<br>Buil  | This HI-HIDE Eggshell was designed to provide one-coat coverage over virtually all colors. It applies easily, without spattering. This product complies with LEED Green Building Rating System GS-11 for interior non-flat paints.  |                               |                |                        |               |            |            |  |
| WHERE TO US   | Plas<br>Woo<br>Met  | Drywall Pro-Tech Latex Eggshell Enamel can be applied to walls, woodwork,<br>Plaster trim, paneling, doors or dadoes. It is a good choice for interior bed-<br>rooms, family rooms, hallways, recreation rooms, commercial or rental<br>properties.<br>Masonry  |                               |                |                        |               |            |            |  |
| Surface<br>Preparation:   | flak<br>and<br>wax<br>Sur-<br>clea<br>smo<br>san<br>with<br>Prin<br>D<br>Pl<br>W<br>Fe<br>G | Surface to be painted must be clean and free of dirt, chalk, wax, grease, rust or loose,<br>flaking paint. Dirt and chalk should be removed by scrubbing with warm soapy water<br>and thoroughly rinsed with clean water. Wax should be removed with a commercial<br>wax stripper or by solvent cleaning. Grease should be cleaned by using Coronado<br>Sur-Prep 1. Rust must be removed by hand sanding or by conscientious power-tool<br>cleaning. Remove loose paint by scraping. Feather sand rough edges to insure a<br>smooth finish coat. Glossy surfaces must be dulled by lightly sanding. Remove<br>sanding dust before paint application. Any exposed substrate should be spot primed<br>with the appropriate primer.<br>Priming - (new or bare surfaces)<br>Drywall – Self-Priming, but for best results use #4190 Latex Primer Sealer.<br>Plaster – For best results use No. 50 Block It or #2000 Sungard.<br>Wood – Alkyd Primer Undercoat 37-11.<br>Ferrous Metal – Rust inhibiting metal primer such as 35-111, 2090 or 925-147.<br>Galvanized – Acrylic Primer 36-11 or 180-11.<br>Masonry – Masonry Sealer 43-10, 48-10, Block Filler 946-11. |                               |                |                        |               |            |            |  |
| Application:  | Ena<br>app<br>actu<br>For<br>for<br>usir<br>betv<br>type                                    | Stir product with a circular, lifting motion before you begin to paint. Pro-Tech Eggshell<br>Enamel may be applied by brush, roller, pad, or spray techniques, at a rate of<br>application not to exceed 400 sq ft per gallon. Surface texture and porosity will effect<br>actual yield. For best brush application results, use a quality synthetic filament brush.<br>For roller application, use a 3/8" nap cover for smooth surfaces, and a ½" nap cover<br>for semi-rough surfaces. Do not jeopardize the success of your painting project by<br>using poor quality applicator tools. Apply only when surface and air temperatures are<br>between 50°F and 90°F. <b>Airless</b> – Tip size at atomization pressures will vary with<br>type of equipment, viscosity and temperature. An orifice of .017019 will provide the<br>most satisfactory spray pattern.<br><b>NOTE: Formulated without mercury or lead.</b>   |                               |                |                        |               |            |            |  |
